SPECIAL OBJECT

The prime object of the exhibition is to show what Sciences and Applied Sciences owe to research workers.

The aim of the promotors is to bring attention to the progress achieved in education, laboratories and technical equipment ; to the development of museums and the facilities afforded for experimental work ; to the achievements of scientific investigations and their application to industry and methods of production.

The industrial exhibition will also be divided in order to emphasise the latest progresses made in the numerous fields of industrial research, output and efficiency.
